PROJECTS

Amele Forensic Tool
Forensic Tool
Collect digital evidence in one place. A fast, auditable, and plain workspace for disk, RAM, and Android acquisition.

Codetasker
Open-Source, Two-Way GitHub TODO and Task Management Platform
It uses Go and React, with Vite.js as its engine. (codetasker.noirlang.tr)

Differ
A focused desktop Git change explorer designed for commit history, contributors, differences, and repository status.
It uses Rust and tauri. (differ.noirlang.tr)

Dispatch
Next-generation minimalist email experience powered by AI assistance, instant email translation, sender approval queues, and spy tracker shield security. https://dispatch.noirlang.tr

Forgetag
It is a modern, "local-first" desktop archiving application that lets you organize your files, folders, and notes using tags and metadata. Your data always remains under your control.
It uses Rust and tauri. (forgetag.noirlang.tr)

Megaron
A calm project workspace for teams. Every project starts as an empty hall; teams add the rooms they need: to-dos, message board, docs & files, calendar and chat. Web and native Android, updated live.
megaron.noirlang.tr

Hyperstructure
Modern Social Media
An open-source modern social media app built as a hobby. It uses Vue and Rust, and MongoDB as its database. (github.com/melihemik/hyperstructure)

Sievert
Simulate future problems today.
A platform that simulates future problems today. It uses Vue and Python. (sievert.noirlang.tr)

Kriya
An autonomous AI-powered penetration testing tool.
It uses the Go programming language. (github.com/noirlang/kriya)
